Training to use Pictures of Success can be provided to meet your interests, aims and learning objectives.

Training sessions can range from one-hour introductions to three-hour workshops for experienced facilitators.

Longer and more extensive programmes can also be arranged that include an in-depth examination of resources and applications or integrated skills development.

Pictures of Success shows how companies, NGOs and others are helping to address poverty, hunger, climate change, environmental degradation and other pressing issues.

Each story shows how constructive engagement with big issues in the world can enrich peoples' lives and be the motive force for completely new and pioneering enterprises.

What makes Pictures of Success unique is the framework of the Earth Charter – a declaration of fundamental ethical principles for building a just, sustainable and peaceful global society. By associating each story with a specific principle, action can be seen in the context of a global citizen’s view of sustainability.
Pictures of Success comprises a website, web-based and social media resources, a boxed set of 80 printed picture cards with vivid quotes, background stories and the text of the Earth Charter.

It also offers a unique process that can create employee engagement, community development and networking, and serve as a powerful learning and developmental tool in formal and informal educational settings.

**Uses of Pictures of Success**

Pictures of Success has already been used in a wide range of applications and settings including:

- to develop a community of shared interest amongst companies
- to guide the review and revision of company operating policies
- to facilitate personal introductions, as an icebreaker and to open up dialogue at conferences, seminars, workshops and meetings
- as an introduction to sustainability and sustainable development and to facilitate policy development and action planning
- as an introduction to the Earth Charter and to facilitate a deeper exploration and engagement
- to expand perspectives on the responsibilities of business
- to rethink the role of business in society and the nature of success
- to stimulate corporate community investment
- in educational settings with groups ranging from primary to postgraduate, from teaching in schools to research in Development Education and Education for Sustainable Development
- in client consultations, by psychologists, sustainability practitioners etc.

**Training programmes**

Training programmes can be designed and staffed to meet your interests and learning objectives. They can range from two-hour workshop sessions for experienced facilitators to longer and more extensive programmes involving an in-depth examination of resources or integrated skills development.

A selection of elements can be incorporated into a training programme including:

- getting to know Pictures of Success - content, design elements and underlying structure
- introduction to the Earth Charter
- uses of Pictures of Success - case studies
- working with the picture cards
- facilitating engagement and group work
- Pictures of Success online resources
- Earth Charter principles Review
- issue mapping techniques.
